Barcode Inventory for Magento2

1. Overview

Barcode Inventory for Magento 2 extension is designed to easily update products stock level using a barcode reader.

As a prerequisite, product barcodes must be stored in a Magento attribute.

Then, scanning a barcode, you will be able to easily increase, decrease or manually change the stock level.

History

Barcode	Sku	Name	Action	New stock level
161	MH07-XL-Gray	Hero Hoodie-XL-Gray	+1	101
162	MH07-XL-Green	Hero Hoodie-XL-Green	+1	101

2. Installation

First Installation

To install a boostmyshop magento2 extension on your platform, process the following steps :

- Download zip archive from your boostmyshop customer account
- Upload files on your server : once uploaded, module must be in directory `app/code/BoostMyShop/BarcodeInventory`
- Connect on your server via ssh. and run the following commands :

```
php bin/magento module:enable BoostMyShop_BarcodeInventory
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy
```

Once everything is done, go back in Magento, select menu System > Web setup wizard, then click on the component manager button : you should see the new extension there.

Upgrade

The upgrade process is exactly the same as the installation process

Disable extension

To disable an extension, select menu System > Web setup wizard, then click on the component manager button.

Find the extension you want to disable and select "Disable" in the "Actions" column.

3. Configuration

The configuration is available in menu Stores > Configuration > Boostmyshop > Barcode Inventory.

4. How to use

General

- **Barcode attribute** : Select here the Magento attribute that contains products barcode.
- **Default Mode** : Defines the default mode used in Barcode Inventory. There are 3 possible modes :
 - Increase mode : When you scan a barcode, product's stock level is automatically increased (+1).
 - Decrease mode : When you scan a barcode, product's stock level is automatically decreased (-1).
 - Manual mode : When you scan a barcode, product's information is displayed and you can manually change the stock level (+1 or -1).

Note

You can also switch between these 3 modes directly from the Barcode Inventory screen.

4. How to use

To display the main screen, go to Catalog > Barcode inventory.

Commit

History

	Barcode	SKU	Name	Action	New stock level
	6	24-MB02	Fusion Backpack	-1	99
	8	24-WB01	Voyage Yoga Bag	-1	99
	8	24-WB01	Voyage Yoga Bag	+15	114

At the top right corner are displayed the 3 different modes.

Note

The default mode set in configuration is automatically selected.

Once you have selected the mode you want, you can start to scan your different products.

You can scan a product as many times as needed, or you can also use the "+" and "-" button and then press "Commit", to update the stock level.

The history table will be updated after each scan.
